Economics & Program Review Section
Communications, Economics & Planning Branch
April, 1989

FOREWORD

This report presents the results of the 1988 Park Visitor Survey conducted in 24 of the most popular provincial park locations during the summer of 1988. Public feedback on the demand for park services and facilities is analysed and the degree of public satisfaction with staff and services is compared to the results of the previous two surveys in 1986 and 1984 in order to reveal changes or trends of interest to park planners and managers.

Although the overall coordination of planning and implementation of the survey was the responsibility of the Economics and Program Review Section, the survey could not have been successfully completed without the cooperation of the following people whose assistance is gratefully acknowledged:

Parks Branch	Mr. Gordon Prouse, Director Ms. Carol Scott, Chief, Visitor Services Mr. Gord Jones, Chief, Planning Mr. Gord Davidson, (Former) Chief, Program Management Mr. Rick Jupp, Chief, Administrative Services Mr. Jim Crone, Head, Marketing Mr. Roger Schroeder, Head, Systems & Management Planning Mr. Ken Porteous, Head, Interpretive Programs Mr. Rod MacCharles, Park Manager, Northwest/Northeast Region
Regional Services Branch	Mr. Harvey Boyle, Director Mr. Wayne Fisher, Headquarters Manager
Systems Section	Mr. Robin Guenther, Programmer Analyst Ms. Betty Miller, Programmer Analyst
Communications, Economics & Planning	Mr. Dana Slusar, Design Coordinator & Consultant Ms. Marg Cox, Administrative Officer
Manitoba Bureau of Statistics	Mr. David Greenwood, Head, Statistical Services

Special acknowledgement is given to Mrs. Sue Boyachek who assisted in the planning and coordination of the survey, edited the completed questionnaires, concisely summarized many thousands of written comments, and prepared the clearly readable tables and final report.

The assistance and cooperation of the many Regional Services staff who distributed and collected the questionnaires is also acknowledged.

24. Number of Adults and Children in Party	62
Section III - Written Comments Summary	65
Section IV - Survey Proposal	103
Section V - Weighting System	112
Section VI - Questionnaire	119

EXECUTIVE SUMMARY

1. Decline in Rowdiness Problem

Survey results clearly show that there has been a marked decline in visitors' perception of the seriousness of the "rowdiness" problem in Parks. The percentage of visitors describing "Rowdiness" as a "Very Significant" or "Somewhat Significant" problem declined to 8.7% in 1988 compared to 11% in both 1986 and 1984 surveys. There was a particularly large decline in the percentage of visitors describing the "rowdiness" problem as "Very Significant" - only 1.7% in 1988 compared to 4% in 1986. This indicates that not only were fewer park visitors bothered by rowdiness but also that the rowdiness which did occur was much less severe than in the past.

The reduction in the rowdiness problem would appear to be the result of the special efforts made over the last two years by Regional Services and Parks Branches in their coordinated approach to addressing this long-standing problem. There is also a related improvement in the rating given by park visitors to Park Patrol staff - only 5.5% indicated this staff category "Needs Improvement", compared to 8% in 1986.

The most popular response to the problem of rowdiness was "More Frequent Patrols" (32.6%) followed by "Stricter Enforcement" (20.2%). The least popular responses to the problem were "Liquor Ban at Problem Parks on Problem Weekends" (5.9%) and "Liquor Ban at ALL Parks on Problem Weekends" (5.4%).

2. Visitors' Enjoyment

A very high percentage (77.5%) of visitors rated their visit as "Very Enjoyable" compared to only 1.6% who rated it "Not enjoyable". While natural factors such as weather have a considerable impact on a visitor's experience, this high rating reflects positively on provincial parks and park staff. This is particularly noteworthy in a mail-in survey because it is usually expected that a higher proportion of visitors who are dissatisfied would be motivated to complete questionnaires.

3. Improvements in Services and Facilities

Significant improvements have been made in the following services and facilities over the past three surveys:

	% of Visitors Indicating Needs Improvement		
	1988	1986	1984
Park Maintenance/Cleanliness	6.4%	7%	10%
Nature/Hiking Trails	4.7%	8%	12%
Picnic Facilities	5.8%	6%	9%
Stores	8.8%	11%	18%

Restaurants	10.5%	10%	17%
Concession Stands	11.2%	15%	23%
Commercial Accommodations	6.0%	8%	13%
Washroom Cleanliness (Not Acceptable rating)	11.4%	11%	16%

4. Factors Attracting Visitors

The main factor attracting visitors is "Beach" (21.7%), followed by "Close to Home" (17.8%). Two "new" factors offered for the first time in the 1988 survey proved to be significant reasons why visitors are attracted to parks: "Quiet and Uncrowded" (4.8%) and "Family Oriented" (4.8%) were selected as the seventh and eighth most popular factors, and were especially important reasons why visitors were attracted to certain locations.

5. Detractions from Enjoyment

The main factor selected by visitors as detracting from their enjoyment was "Dusty Roads" (19.4%) followed by "Dogs" (11.4%).

"Roads" continue to be the facility regarded to be most in need of improvement. 17.8% indicated "Campground and/or Cottage Subdivision Roads" need improvement and 17.1% indicated "Highways in Park" need improvement, both only marginally better than previous surveys.

6. Cost Reduction Preference

The most popular option for "reducing the net cost of operating Provincial Parks was "Closing smaller, less frequently used waysides, campgrounds and parks" (21.7%), followed closely by "Increasing park entrance fees" (21.3%).

7. Printed Information

A high percentage of visitors identified several types of printed information as "important...to have available" - "Map of Area" (68%), "What to see/do at this Park" (56%), "Park rules/regulations" (48%) but only 28.7% indicated that they would be willing to pay a fee for this information, compared to 57.4% who would not.

8. Increased Winter Use

While only visitors using parks in the summer months were surveyed they were asked how much time they spent in provincial parks in both the summer and winter months. While the total amount of time spent (17.2 days) has not changed appreciably the amount of time spent in the winter (2.7 days) has increased to 16% of total time spent compared to 11% in 1986.

9. Increasing Age of Visitors

The average age of park visitors (40.0 years) appears to have increased significantly, by 3.4 years, compared to the 1984 survey results. The average age of cottagers (52.9 years) has increased more rapidly than other visitor categories, by 4.1 years since 1984.

10. Additional Facilities

The additional facilities most visitors would like to see constructed in parks are "Shower Facilities" (25%), Bicycle Trails (19%), More Electrical Sites (15%), and "Nature/Hiking Trails".

11. Performance Indicators

The Park Visitor Survey provides Manitoba Natural Resources with feed-back on the degree of visitor satisfaction with existing Parks services and facilities, and provides an evaluation of how well Department staff are serving the public and whether staff are doing a better or worse job than in the past.

Several key questions included in successive surveys have been designated as "PERFORMANCE INDICATORS" which serve as a measure of how successfully Parks Branch and Regional Services are delivering some of their programs. Attached to this summary is a comparison of Parks Branch management's forecast 1988 Performance Indicator results with actual 1988 survey results as well as results from the 1986 and 1984 surveys. Significant variances from forecast are as follows:

a) "Commercial Services" showed improvement over previous years in 3 of 4 areas - "Concession Stands", "Stores", and "Commercial Accommodation Facilities". "Restaurants" is the one category which remains substantially below the forecast level of satisfaction.

b) The "Interpretive Program" exceeded forecast satisfaction levels for both "Nature/Hiking Trails" and "Amphitheatre Programs".

c) The improvement in the control of "Rowdiness" discussed earlier resulted in a level of satisfaction with "Rowdiness Control" only .7% worse than forecast.

d) Six "Operations & Maintenance" categories equalled or exceeded forecast levels of satisfaction, and another three came within one percent of forecast. "Washroom Cleanliness" failed by a substantial margin to meet the forecast and "Garbage Collection" was 1.1% worse than the forecast.

e) Four categories of "Park Staff" exceeded the forecast level of satisfaction - "Park Gate Staff", "Campground Office Staff", "Visitor Services Attendants/Naturalists" and "Natural Resource Officer/Park Ranger" - while three categories failed to meet the forecast with "Beach Patrol" requiring the most improvement to meet forecast.

f) Under "Overall Branch" performance indicators, the forecast for "Visitor Satisfaction" was exceeded and the "Staff Helpfulness" forecast was achieved.

PERFORMANCE INDICATOR COMPARISON
Weighted Results for 1988, 1984 and 1982 Park Visitor Survey
(Lower Percentage "Needs Improvement" Indicates Better Performance)

SUMMARY OF FINDINGS

SUMMARY OF FINDINGS

A. NOTES TO FINDINGS:

The following notes explain the limitations and biases present in the survey results contained in this report.

1. The reliability of the results varies directly with the number of returns analyzed - the larger the number the more reliable the results. At a 95% confidence level the total results for all sites surveyed are accurate to within $\pm 1.5\%$. This means, for example, that when 77.2% (weighted) of all respondents to Question XVI indicate their overall experience was "Very Enjoyable" that there is a 95% probability that the actual percentage of park users who feel this way is between 75.7% and 78.7%. The range of accuracy widens for individual sites because fewer returns are received. Results for a site like Falcon Lake with a large number of returns (461) are accurate to $\pm 4.4\%$ at a 95% confidence level, while results for a site like Bakers Narrows with fewer returns (107) are accurate only to within $\pm 9.2\%$. Caution should therefore be used in drawing conclusions from results which indicate changes from previous surveys or differences between sites which are within this range of accuracy. Results for individual visitor categories by site tend to have a wide range of accuracy because there are often so few respondents in these categories. No individual visitor category results are shown in cases where there are fewer than 10 responses for a particular visitor category at a site, because results from such small samples are very likely to be unrepresentative.
2. Since there was a somewhat different mix of parks/campgrounds surveyed in 1984, 1986 and 1988 the overall "total" survey results are not completely comparable. Differences in the "mix" of responses from different visitor categories could also affect the comparability of results from different years for the same site. A significant change in the 1988 Hecla results can be attributed to the decision to not mail out questionnaires to cottagers at neighbouring Grindstone Provincial Recreational Park, as had been done in 1986. 1988 results are therefore not completely comparable to those of 1986 which had much higher returns from cottagers (76 returns or 22% of total Hecla returns versus no cottager returns in 1988) who would have provided their views on Grindstone rather than Hecla Provincial Park, on at least some questions.
3. Since only 24 parks/campgrounds were surveyed in 1986, compared to 37 in 1986 and 22 in 1984, caution should be used in drawing conclusions about all Provincial parks/campgrounds from the survey. Smaller, less frequently used sites are underrepresented.
4. Since the questionnaires were distributed in the last two weeks in July and, to a lesser extent, in the first two weeks in August, the results may not be representative of visitors to Parks earlier or later in the season. In order to include in the survey more of the large number of fishermen who use Bakers Narrows and Grass River Provincial Park earlier in the season, questionnaires were distributed in mid-June at these locations.

5. Because survey questionnaires were mailed directly to cottagers and seasonal campers in 1988 and 1986 a much larger proportion of these users returned questionnaires than in 1984. Weighted results are compared for 1988, 1986, and 1984 because the weighting method is designed to correct for differences between the number of survey returns and the number that would have been received if returns were directly proportional to the estimated number of actual users in each category at each site. The return rate from day users was disappointing - only 652 returns or 15.3% of total returns - requiring a high weight to correct for the lack of returns from this visitor category which is estimated to make up 64% of total park visitor days. The high weight assigned to the relatively small number of day user returns may have exaggerated the impact of day user responses in the weighted results for the following sites with a small number of day user returns: Black Lake, Bakers Narrows, Blue Lake, Childs Lake, Grass River, Wellman Lake. It is recommended that "raw", ie., unweighted, results be used in cases where there is a big discrepancy between the "raw" and weighted results for these sites. This problem with the weighted results at these sites does not significantly affect the overall weighted results which are strongly influenced by the most heavily used Parks such as Grand Beach, Birds Hill, etc. See Section V for a description of how the weights were calculated.
6. At Falcon Lake, only campers at the Beach Campground were surveyed in 1988, in order to be consistent with the 1986 and 1984 surveys.
7. The three sites located in Grass River Provincial Park - Gyles Park, Iskwasum Landing, and Reed Lake - were combined as one site for the 1988 survey in order to overcome the problem of very low returns and hence unreliable individual site results experienced in 1986. Results for Grass River should therefore be interpreted as applying generally to all three locations at which questionnaires were distributed, but not specifically to any one site.
8. Cottagers at Eleanor Lake and Dorothy Lake were mailed survey questionnaires and included in the Otter Falls results in 1988 because they are located in close proximity to Otter Falls cottagers. The resulting increased returns from cottagers can be expected to reduce the comparability of 1988 results with those from 1986 and 1984 when these cottagers were not surveyed. The Dorothy Lake Trailer Village was not included in the survey for 1988 or earlier years.
9. The "Summary of Findings" Section which follows reviews the survey results for all sites but does not focus on the many differences between individual sites. In order to identify specific sites where results differ from the average for all sites one should refer to the detailed tables in Section II "Basic Survey Results".

B. Summary of Findings:

- I, II. A total of 20,204 questionnaires were distributed of which 4,260 were completed accurately and returned in time for processing, a return rate of 21.1%. See "1988 Survey Distribution and Returns" for a detailed breakdown of numbers distributed and returned by site and by Visitor Category.

Sites which showed a greatly improved return rate than 1984 were Grand Beach (411 from 325), Otter Falls (135 from 63), St. Ambroise Beach (121 from 82), the Duck Mountain Park locations (total of 257 from 196) and Birds Hill Day User Category (81 from 22).

Sites which showed a significant reduction in return rate were Falcon Lake (461 from 587), Hecla (184 from 342), Paint Lake (130 from 169) and Stephenfield (115 from 155).

- III. The main factor attracting visitors, especially day users, is "Beach" (21.7%) followed by "Close to Home" (17.8%).

The main factors attracting visitors to individual sites vary a great deal from site to site as shown by the individual site results presented. Results for the 6 "new" factors added to this questionnaire in 1988 were as follows:

Factor:

"Quiet and Uncrowded" - This was selected as the overall 7th most popular (4.8%) factor and a very important factor, i.e. over 10%, at six sites. A decline in the popularity of "Wilderness Atmosphere" from 5th most popular in 1986 to 12th in 1988 appears to have resulted from many visitors selecting "Quiet & Uncrowded" in preference to "Wilderness Atmosphere."

"Family Oriented" - This factor was equally popular (4.8%) to "Quiet and Uncrowded".

"Meet People/Socialize" - A significant factor at Grand Beach (5.0%) and Wellman Lake (4.5%).

"Golfing" - Very significant factors attracting visitors to Hecla (12.2%) and Falcon Lake (8.9%).

"Wildlife Viewing" - Not a significant overall factor (0.9%).

"Historic Feature" - Not a significant overall factor (0.2%).

- IV. Use of facilities varies greatly between sites as reflected in Table IV. The most used facility was "Beach" (76.0%).

Aside from "Beach", other facilities of significant use (greater than 50%) are as follows:

- a) Stores - Bakers Narrows (88.6%), Wellman Lake (80.7%), Falcon Lake (82.1%), Caddy Lake (78.7%), Nutimik Lake (78.4%), Otter Falls (74.8%), Big Whiteshell (72.8%), Blue Lake (71.8%), Brereton Lake (69.2%), Spruce Woods (68.3%), West Hawk (64.3%) and Childs Lake (62.4%)
- b) Change Rooms - Grand Beach (56.4%).
- c) Picnic Facilities - Bakers Narrows (76.0%), St. Ambroise (57.7%) Stephenfield (57.5%) and Blue Lake (50.6%).
- d) Nature/Hiking Trails - Blue Lake (57.5%), Hecla (57.0%), Childs Lake (54.7%) and Spruce Woods (53.0%).
- e) Children's Playground - Adam Lake (63.2%) and Bakers Narrows (52.4%).
- f) Concession Stand - Spruce Woods (62.4%) and Asessippi (52.4%).
- g) Showers - Bakers Narrows (58.7%).
- h) Boat Launch/Marina - Grass River (53.6%).
- i) Service Station - Falcon Lake (62.1%).
- j) Golf Course - Falcon Lake (52.9%).
- k) Museum/Visitor Centre - Spruce Woods (50.0%).

- V. There is a trend towards significantly better results in the overall ratings of the following park services and facilities over the past three surveys:

	% of Visitors Indicating Needs Improvement		
	1988	1986	1984
Park Maintenance/Cleanliness	6.4%	7%	10%
Nature/Hiking Trails	4.7%	8%	12%
Picnic Facilities	5.8%	6%	9%
Stores	8.8%	11%	18%
Restaurants	10.5%	10%	17%
Concession Stands	11.2%	15%	23%
Commercial Accommodations	6.0%	8%	13%

"Roads" continue to be the facility regarded to be most in need of improvement. 17.8% indicated "Campground and/or Cottage Subdivision Roads" need improvement and 17.1% indicated "Highways in Park" need improvement, both only marginally better than previous surveys.

"Boat Launch Facilities/Marina" was a new category of service added to the 1988 survey which resulted in a "Needs Improvement" rating of 6.7%.

No park service or facility was rated significantly worse than in previous surveys.

- VI. The Washroom Cleanliness rating was unchanged from 1986 but significantly better than 1984:

	% of Visitors Indicating		
	<u>Needs Improvement</u>		<u>"Not Acceptable"</u>
	1988	1986	1984
Washroom Cleanliness	11.4%	11%	16%

The most significant reasons for the "Not Acceptable" rating were "Odour" at 25.6% and "Not Cleaned Often Enough" at 20.1%.

- VII. A slightly higher percentage (11.6%) of respondents rated "Beach Condition" as "Not Acceptable" than in 1986 (11%).

The most common reasons for the "Not Acceptable" rating were "Lake Bottom (rocks, mud, weeds)" (51.4%) and "Water Quality" (29.7%). These reasons are consistent with the explanation that the drought caused low water levels of 1988 resulted in a natural deterioration of water quality in many Park locations.

Of the "Other" comments received, one with the highest occurrence was "too much algae/weeds in the water."

- VIII. Visitors were asked to indicate what factors, if any, detracted significantly from the enjoyment of their park visit. The factors identified, listed in order of importance, as follows:

	<u>% of Visitors Indicating Significant Detraction from Enjoyment</u>
Dusty Roads	19.4%
Dogs	11.4%
Other	11.1%
Loud Music	9.0%
Excessive Traffic Speed	8.6%
Late Night Parties	6.9%
Overcrowding	5.0%
Park Maintenance/Cleanliness	3.6%
Vandalism/Theft	3.0%

Just under half of all visitors (49.3%) indicated that something significantly detracted from their enjoyment. The most favourable results were found at Adam Lake (25.0%) and Birds Hill (29.9%). Day Users were the Visitor Category with the lowest percentage of complaints (35.4%), followed by Campground Users (43.1%) and Cottagers (59.6%). Seasonal Campers had the highest percentage of complaints (66.4%).

Of the "Other" comments received, ones with the highest occurrence were; "lack of or no showers," "poor/terrible/rough roads," "power boats too loud, too close to shore or swimmers" and "annoyances from pests."

- IX. a) There was a big improvement in visitors' perception of the seriousness of the "rowdiness" problem in Parks. The percentage of visitors describing "Rowdiness" as "Very Significant" or "Somewhat Significant" declined to 8.7% from 11% in both 1986 and 1984.

There was a particularly large decline in the percentage of visitors indicating that "rowdiness" was "Very Significant" - only 1.7% in 1988 compared to 4% in 1986. This indicates that not only were fewer park visitors bothered by rowdiness, but that the rowdiness which did occur was much less severe than in the past.

- b) The most popular response to the problem of rowdiness was "More Frequent Patrols" (32.6%) followed by "Stricter Enforcement" (20.2%). The least popular responses to the problem (after "Other" at 5.9%) were "Liquor Ban at Problem Parks on Problem Weekends" (5.9%) and "Liquor Ban at ALL Parks on Problem Weekends" (5.4%).

Only visitors who indicated in Part A) of this question that rowdiness was a problem for them were asked to answer Part B). These results therefore represent the views of the 408 visitors who answered Part B), but may not necessarily reflect the views of the large majority of respondents who experienced no significant rowdiness problem.

- X. The proportion of visitors who indicated the "overall helpfulness and courtesy of Park staff" "needs improvement" remained the same (3.0%) as in the 1986 survey. A very impressive 79.3% of Adam Lake visitors rated their location's park staff as "Very Good" compared to an overall of 53.2% for all locations.

The two staff categories which continue to have the least favourable ratings are "Beach Patrol" (7.0% "Needs Improvement") and "Park Patrol" (5.5% "Needs Improvement"). The more favourable rating of the rowdiness problem in Question IX is consistent with the improvement in the rating of "Park Patrol" staff which has improved from a 1986 "Needs Improvement" rating of 8%, although the range of accuracy ($\pm 1.5\%$) of the results does not allow one to conclude that there has necessarily been an improvement.

- XI. At sites which maintain a Volunteer Campground Host, the percentage of people that met this person ranged between 2.5% to 40.0%. A very high percentage of people that met a Campground Host found the host a helpful person.

- XII. The types of printed information regarded as important to have available have remained comparable to 1986.

	<u>1988</u>	<u>1986</u>
Map of Area	68%	74%
What to see/do at this Park	56%	56%
Park rules/regulations	48%	52%
What to see/do in area	40%	45%
Nature information	37%	45%
Historical information	27%	32%
Brochures for children	24%	25%
Other	2%	3%

28.7% of visitors responded positively that they would be willing to pay a fee for this printed information, compared to 57.4% who said they would not be willing to pay. A significantly higher percentage of cottagers (39.0%) indicated a willingness to pay a fee.

Of the "Other" comments received, ones with the highest occurrence were; "map of lake and/or rocks" and "lake depth maps."

- XIII. Although in the 1988 survey there were six less options to choose from and a maximum of 5 choices was specified, the additional facilities visitors would like were very similar to 1986.

	<u>1988</u>	<u>1986</u>
Shower facilities	25%	26%
Bicycle trails	19%	21%
More electrical sites	15%	16%
Nature/hiking trails	14%	13%
Laundromat	12%	10%
Restaurant	12%	10%
Cabin rentals	11%	10%
Picnic shelter	11%	12%
Children's playground	10%	12%
Store	9%	14%

Of the "Other" comments received, the ones with the highest occurrence were; "golf course" and "improving/expanding or adding boat launch and docking facilities."

- XIV. The most popular option for "reducing the net cost of operating Parks" was "Closing smaller, less frequently used waysides, campgrounds and parks" (21.7%). This option rated the highest in the 1986 survey results as well. The option which ranked a close second was "Increasing park entrance fees" (21.3%) which had not been included as an option in the 1986 survey. It should be noted that the option "none of the above" was not offered.

Of the "Other" comments received, the ones with the highest occurrence were; "leave as is/none of the above," "reduce staff," "charge/increase camping fees" and "charge day use fees."

- XV. A) & B) Visitors spent a comparable amount of time in the previous year (1987) in provincial parks as they reported spending in the previous two surveys. There appears to be an increase in the amount of winter use (2.7 days) compared to 1986 (2.1 days), an increase to 16% of total time spent from 11% in 1986.

	TOTAL (no. of days)			WINTER (no. of days)	
	1988	1986	1984	1988	1986
Day User	11.3	11.3	10.6	2.3	1.5
Cottager	41.6	41.0	36.5	5.8	6.6
Campground User	13.3	12.8	12.8	1.2	1.1
Seasonal Camper	37.3	35.7	25.3	1.9	1.8
TOTAL	17.2	18.4	15.0	2.7	2.1

- C) 38.9% of respondents spent the same amount of time, 34.7%, spent more time for a total of 73.6% of respondents who have spent the same or more time in provincial parks compared to the time spent 5 years ago. 26.4% spent less time than 5 years ago.

- XVI. Overall experience ratings have changed little from 1986 survey results - the small increase in the percentage of people rating their experience as "not enjoyable" (1.6% from 1.3%) is well within the range of accuracy of survey results ($\pm 1.5\%$).

The percentage of visitors rating their experience as "Very Enjoyable" (77.5%) remained at the very high level reached in 1986 (77.2%), a marked improvement over 1984 (65%). While natural factors such as weather have a considerable impact on a visitor's experience, these high ratings are a very positive reflection on provincial parks and park staff.

- XVII. The residence of park users has remained very comparable to the 1986 survey results.

	1988	1986	Day User	Cottager	Seasonal	
					Cmpgrnd User	Cmpgrnd User
Winnipeg	56.3%	52%	54.3%	72.7%	46.0%	70.4%
Manitoba location other than Winnipeg	33.3%	35%	35.1%	22.6%	37.3%	29.0%
Saskatchewan	3.0%	3%	3.1%	0.7%	5.3%	0.6%
Ontario	1.7%	2%	1.4%	0.9%	4.0%	0.0%
Province other than MB, SK, or ON	2.7%	3%	3.2%	1.9%	2.2%	0.0%
Minnesota	1.2%	1%	1.6%	0.0%	1.2%	0.0%
North Dakota	0.2%	1%	0.1%	0.1%	0.7%	0.0%
Other location outside of Canada	1.5%	4%	1.2%	1.1%	3.3%	0.0%

Park User travelled an average of 151.6 kilometres from their homes. Total average distances travelled results are as follows:

	<u>TOTAL</u>	<u>Day User</u>	<u>Cottager</u>	<u>Cmpgrnd User</u>	<u>Seasonal Cmpgrnd User</u>
1988	151.6km	141.3km	141.8km	205.0km	128.2km
1986	162	137	159	213	116
1984	154	149	173	234	166

XVIII. The average age for park visitors in 1988 was 40.0 years with Visitor Category breakdown as follows:

	<u>AVERAGE</u>	<u>Day User</u>	<u>Cottager</u>	<u>Cmpgrnd User</u>	<u>Seasonal Cmpgrnd User</u>
1988	40.0	36.9	52.9	39.3	41.6
1986	40.0	36.0	51.5	40.5	42.3
1984	36.6	35.4	48.8	38.5	40.6

It is of interest to note that the average age of park visitors appears to have increased significantly, by 3.4 years, compared to the 1984 survey results. The average age of cottagers is increasing more rapidly than other visitor categories, by 4.1 years since 1984.

XIX. The response to the question of "How Many People are there in Your Party?" was as follows:

A) # of Adults	% Respondents	B) # of Children	% Respondents
One	9.0%	One	25.5%
Two	57.6%	Two	40.5%
Three	11.4%	Three	17.1%
Four	12.0%	Four	9.4%
Five	2.4%	Five	2.4%
Six	2.5%	Six	1.8%
Over six	5.1%	Over Six	3.3%

Note:

(*) This total is the cumulative total of detraction ratings per site providing a relative comparison only, between sites, since each respondent may have indicated that either one or several factors detracted from their experience. In general, the smaller the percentage the more favourable the response.

(**) This is the percentage of respondents who indicated that something significantly detracted from their enjoyment.

TOTAL non-respondents to this question was 2,044.

Note: (-) No response is shown where there are fewer than 10 responses for a visitor category.

> Since this staff category is MOI available at this location, the "Needs Improvement" rating is MOI a reflection of staff performance. A high "Needs Improvement" rating may suggest a desire for provision of this staff service at this location.

* The high weights assigned to the small number of day users who responded at this location distorts this weighted result which is therefore unreliable. Use of the "raw percentage" is therefore recommended.

Note: (-) No response is shown where there are fewer than 10 responses for a visitor category.

> Since this staff category is NOT available at this location, the "Needs Improvement" rating is NOT a reflection of staff performance. A high "Needs Improvement" rating may suggest a desire for provision of this staff service at this location.

* The high weights assigned to the small number of day users who responded at this location distorts this weighted result which is therefore unreliable. Use of the "raw percentage" is therefore recommended.

X. 8) Rating of Services Provided by the Following Categories of Park Staff Which are Available at this Park/Campground (results are weighted by Site and Visitor Category).

Note: (-) No response is shown where there are fewer than 10 responses for a visitor category.

* The high weights assigned to the small number of day users who responded at this location distorts this weighted result which is therefore unreliable. Use of the "raw percentage" is therefore recommended.

SURVEY PROPOSAL

PARK VISITOR SURVEY PROPOSAL (1988)

I. Background of Survey

(A) Purpose of Survey

The purpose of the proposed survey is to provide park planners and managers with public feed-back regarding the demand for park services and facilities, and the degree of visitor satisfaction with existing services and facilities. The survey will also provide information regarding problems areas (rowdiness and traffic speed), park visitations, motivating factors that affect park visits, cost reduction options, and visitor profiles (place of residence, age, etc.).

The information obtained from the survey will be used in the process of planning new park services and facilities and in developing strategies to improve or modify existing services and facilities.

(B) Title of Survey

Manitoba Provincial Parks
Visitor Survey (1988)

(C) Sponsoring Department

Manitoba Natural Resources

(D) Contact Person

Ray Delbaere, Senior Resource Analyst
Economics & Program Review Section
Manitoba Natural Resources
Box 38, 1495 St. James
Winnipeg, Manitoba
R3H 0W9

Telephone: 945-2305

II. Survey Objectives

(A) Visitor Satisfaction

To determine the degree of visitor satisfaction with existing park facilities, programs and services in order to determine any problem areas where corrective action may be required.

(B) Visitor Demand

To determine what park facilities, program and services are most in demand by park visitors. This demand will be considered when establishing priorities for new park facilities, programs and services.

(C) Attraction Factors

To determine what factors most affect a park visitor's decision to visit Provincial Parks. This information will be used when planning for new parks, in planning for changes to existing parks, and in developing market strategies.

(D) Facility Use

To determine use levels for various existing park facilities/programs. This information will be considered when planning for new park facilities/programs.

(E) Problem Areas

To determine the degree to which rowdyism and a number of other factors are a problem in Provincial Parks. This information will be considered in developing enforcement programs.

(F) Visitor Use

To determine park use levels by those persons visiting Provincial Parks. This information will be considered when planning new parks or park expansions and in developing marketing strategies.

(G) Visitor Profile Information

To obtain visitor profile information such as place of residence, distance travelled, age, and group size. Such information will be considered when developing marketing strategies.

III. Target Population

The target population is all park visitors during the survey period at selected Provincial Park locations. Categories of park visitors include day users, campers (transient and seasonal), cottagers, those using commercial accommodation and others.

The attached Schedule "1986 Survey Distribution Plan" shows the number of surveys to be distributed by site and the number of returns expected, based upon the user category return rates experienced in 1986.

IV. Survey Costs and Time Frame

(A) Timetable

- | | | |
|-----|---|---|
| 1. | Determine survey objectives | - December 15-31, 1987 |
| 2. | Develop survey proposal | - December 15/87 - March 15/88 |
| 3. | Develop draft survey questionnaire | - December 15/87-March 15/88 |
| 4. | Review and revise survey questionnaire and survey proposal | - March 1-25, 1988 |
| 5. | Pre-test questionnaire and revise if necessary | - April 1-15, 1988 |
| 6. | Obtain survey approval from A.D.M., D.M., and Man. Bureau of Statistics | - April 15-22, 1988 |
| 7. | Arrange for and obtain printed questionnaires and envelopes (including postal stamps) | - April 22-May 31, 1988 |
| 8. | Arrange for survey distribution | - June 1-3, 1988 |
| 9. | Distribute questionnaires and instructions | - July 4-8, 1988 |
| 10. | Survey period | - July 13-19, 1988
(extended to August 15/88 at lower use sites) |
| 11. | Arrange for Programming of data | - June 1-July 31/88 |
| 12. | Return deadline | - September 9, 1988 |
| 13. | Data entry | - September 12-30, 1988 |
| 14. | Computer output | - October 10, 1988 |
| 15. | Data analysis | - October 10 - November 31/88 |
| 16. | Report preparation | - December 1-31/88 |

(B) Survey Costs

(i) Dollars (\$) - direct expenditures

-	printing of questionnaires and envelopes	6,000
-	key punching (Man. Data Services)	3,000
-	computer time (Man. Data Services)	500
-	postage (Government Services)	
	(4,576 mailed @ 37¢, est. 1,500	
	@ 41.2¢)	2,500
		<u>12,000</u>

(ii) Staff

-	Economics & Program Review Section	
-	prepare survey proposal, develop survey questionnaire, coordinate survey, analyze data and prepare report	2 months
-	Regional Services Branch	
-	distribute and pickup questionnaires	during normal duties
-	Parks Branch	
-	assist in developing survey objectives and survey questionnaire, in coordinating survey distribution and in reviewing survey results	2 weeks
-	Systems Branch	
-	programming and data output	1 month
-	Manitoba Bureau of Statistics	
-	proposal review	1 day (est)
-	Public Information Section	
-	arrange for printing of questionnaire and envelopes	1 day (est)

V. Survey Design

(i) Questionnaire

- draft questionnaire attached (Appendix I)

(ii) Sampling Scheme

- see attached Appendix II for list of parks to be surveyed; for 1988; proposed allocation of questionnaires

Estimated total distribution	22,500
Estimated total return @ 21%	4,800
(includes questionnaires returned by mail plus those picked up & returned to staff at Parks)	

Since weekends accounts for approximately one-half of all use, an effort will be made to distribute 50% of questionnaires on weekdays with the remaining 50% being distributed on weekends (some Park specific variations to this rule may be required). At parks with low use, an extended distribution period of up to 2 weeks or longer will be used. Sites which experiences heavy demand from fishermen in June will have questionnaires distributed in June. All cottagers and seasonal campers at the selected parks will be mailed a questionnaire.

- (iii) Estimated time to complete questionnaire - 10 minutes

VI Survey Operation

- (i) Pre-test - to be conducted with departmental staff. Results will be used to determine problem areas with questionnaire design and wording. Revisions will be made as deemed necessary.
- (i) Regional Services staff will distribute questionnaires at selected parks. Distribution instructions to staff will be drafted. Questionnaires will be all mailed direct to all cottagers and seasonal campers. Visitor Services staff will distribute copies to commercial operators.
- (iii) Public will return surveys by mail or can return them to staff at the Parks. However, the response rate in campgrounds will be improved by having staff collect completed questionnaires during the course of their regular duties.

VII. Survey Quality Control

- (i) Verification Techniques
 - (A) all questionnaires will be manually checked by secretarial staff for problems related to coding;
 - (B) Systems Section staff will review and verify output to ensure that it meets management needs.
- (ii) Outline of Data Output
 - see attached Appendix III
- (iii) Data Availability - Survey findings will be prepared by the Economics and Program Review Section. Conclusions will be drawn by consensus of the Director of Parks, Chief of Planning (Parks), Chief of Program Management (Parks), Chief of Visitor Services (Parks) and Chief of Economics and Program Review Section.

A standard format for tabulation of results will be established to facilitate the comparison of results from the current survey with the results from prior years surveys. This will facilitate preparation of the main survey report summarizing findings, and also facilitate preparation of special computer reports from data on file.

Conclusions of the survey may be made public. Basic survey results, cross-tabulations, findings and conclusions will be circulated internally to staff involved with Park management or planning. "Park specific" findings will also be circulated to appropriate staff involved. This information "could" also be made available to others "on request". Actual questionnaires (which include extensive written comments) are provided to the respective Department field staff for their review.

- (iv) Weighting Procedures - to be discussed with staff of Manitoba Bureau of Statistics at time of data analysis. Survey results, where appropriate, will be weighted to reflect actual visitations by Park and/or by visitor category. A test count will be made of the actual number of visitors in each category at selected parks in order to check the accuracy of the weighting formula used.

APPENDIX II

1988 SURVEY DISTRIBUTION PLAN

Number of Surveys to be Distributed

<u>LOCATION</u>	<u>SEASONAL CAMPSITES</u>	<u>COTTAGERS</u>	<u>CAMPERS</u>	<u>DAY USERS</u>	<u>TOTAL</u>
Adam Lake	21	250	350		621

3, 4, 5, 6, 8, 11, 12A, 13A, 15, 15A, 15B, 15C, 16A,
17A, 17B, 18, 19
4. Cross-Tabulations - by place of residence (#17A)
15A, 15B
5. Cross-Tabulations - by site and visitor category (#1 and #2A)
5, 6A, 7A, 9A, 10A, 10B

WEIGHTING SYSTEM

WEIGHTING SYSTEM

The distribution plan outlined in detail in Section IV (Survey Proposal) resulted in a number of biases in the survey data. This biases resulted from:

1. all seasonal campers and cottagers at surveyed sites receiving questionnaires.
2. the disproportionally large number of campers who received questionnaires, combined with the extra effort to collect completed questionnaires from campers.
3. the disproportionately low number of day users who received questionnaires which was due, in part, to the absence of suitable distribution points at some locations.
4. the disproportionately large number of questionnaires handed out at lower use parks/campgrounds.

In an effort to overcome the aforementioned problems, a weighting system was devised to more accurately reflect overall park visitor opinions at the parks/campgrounds that were surveyed. Since there was no quantifiable data on day users, guests in commercial accommodation or "others", a decision was made to first, derive day use data from other available data (vehicle entries, campground use, number of cottages and seasonal campers) and second, to ignore use by guests in commercial accommodation and "others". Since these latter groups (guests in commercial accommodation and "others") are relatively small user groups and accounted for less than 5% of the returned questionnaires, it is thought that their exclusion would not have dramatically altered the weighted results. Also provided a zero weighting in the weighting process were results from "other" locations.

In deriving day use at each park/campground, the total vehicle entries in 1987 at each location was used as a starting point. (Note: Since the reliability of vehicle entry data is somewhat suspect, particularly at some locations, this could result in inappropriate weighting). From the total vehicle entries at each location was subtracted: a) transient camping unit days in 1987 (including a factor of 1.2 to account for re-entries), b) seasonal camping unit days (number of sites sold in 1987 times average days spent at Provincial Parks in 1985 by seasonal campers as determined from the 1986 survey - including a factor of 1.2 to account for re-entries), c) cottager unit days (number of cottage sites in 1988 times average days spent at Provincial Parks in 1985 by cottagers as determined from the 1986 survey - including a factor of 1.2 to account for re-entries).

Subtracting the foregoing use from total vehicle entries results in net vehicle entries which can be attributed to day users and other miscellaneous categories of users. By allowing for a re-entry factor (.83) similar to that used for transient campers, seasonal campers and cottagers, it was possible to estimate the total days of use by day users. Adding this calculated day use to camping unit days, seasonal camping unit days and cottager days resulted in a total use figure at each location.

Carrying out the foregoing calculation at all locations resulted in an estimated total use for all the sites surveyed (with break-downs by the four major visitor categories at each location). It was a simple matter to then calculate what percentage of total responses should have been received by each visitor category at each location in order to correspond to the actual use. By comparing this percentage with the actual percentage of responses received from each visitor category at each location, it was possible to arrive at an adjustment factor to provide the appropriate weight to the actual responses from each visitor category at each location.

The actual use information and weighting factors are shown in the attached tables.

1968 PARK VISITOR SURVEY - WEIGHTING SYSTEM

Table 2 - Calculation of Weight Based Upon Table 1 Use Data

	TRANSIENT CAMPERS			SEASONAL CAMPERS			COTTAGERS			DAY USERS		
	% Use	% Returns	Adj Factor	% Use	% Returns	Adj Factor	% Use	% Returns	Adj Factor	% Use	% Returns	Adj Factor

QUESTIONNAIRE

Manitoba Provincial Parks Visitor Survey 1988

Manitoba
Natural Resources
Parks

Dear Visitor:

Welcome to Manitoba's provincial parks. Parks are established to protect our natural and cultural heritage and to provide you with opportunities for enjoyable outdoor recreational experiences.

Please take a few minutes to fill out this questionnaire so we can find out how we are doing. We want to know what you like and dislike about this park as well as what you would like to see in Manitoba's parks in the future. Your answers will be carefully reviewed by park staff so we can learn how to better serve you.

Thank you for helping us make Manitoba's parks more enjoyable to visit.

Relax and enjoy your stay!

C. Gordon Prouse

Gordon Prouse, Director of Parks

How to Complete this Questionnaire:

- This questionnaire should be completed by a member of your group **JUST PRIOR TO YOUR DEPARTURE FROM THE PARK.**
- A reference to **THIS** park or campground means the one you are visiting.
- IMPORTANT: FOR EACH QUESTION, PLEASE INSERT THE NUMBER(S) OF YOUR ANSWER(S) IN THE BOX(ES) PROVIDED — UNLESS OTHERWISE DIRECTED** — in Question I only, an alphabetic code is required. For example, if you are camping, then you should place the number 4 in the box provided beside question number II.
- After you have completed the questionnaire, return it to any park attendant or park office or mail it in the envelope provided. No postage stamp is necessary if mailed within Canada.
- There is nothing in this questionnaire which identifies the respondent. Therefore all responses are strictly confidential.
- Please ignore the numbers beside the answer boxes. They are for office use only.

I. Name of Park/Campground you are visiting: (Sites are listed in **alphabetical** order. Please print the alphabetic park code in the box provided, eg., if you are visiting Birds Hill print "BH" in the box.)

AL Adam Lake	CH Childs Lake	PL Paint Lake

Museum/Visitor Centre	☐	☐	☐	☐ 78	_____

VI. A) How do you rate washroom cleanliness **this** visit?

1. Very Good 2. Acceptable 3. Not Acceptable 4. No Opinion

☐ 101

B) If your answer to Part A) was "**Not Acceptable**", then why, in your opinion, is there a problem?

1. Not Cleaned Often Enough 4. Insects 7. Other (Specify: _____)
2. Not Cleaned Well Enough 5. Odour
3. Vandalism 6. State of Repair of Building/Facilities

☐ 102

VII. A) How do you rate the condition of the beach at **this** Park/Campground?

1. Very Good 2. Acceptable 3. Not Acceptable 4. No Opinion

☐ 103

B) If your answer to Part A) was "**Not Acceptable**", what is your reason for this rating?
(Place an "x" in the appropriate box(es)).

Lake Bottom (Rocks, Mud, Weeds)	☐ 104	Loud Radios	☐ 109
Quality of Sand	☐ 105	Boats/Water Skiers Near Swimmers	☐ 110
Dogs	☐ 106	Quality of Beach Supervision	☐ 111
General Cleanliness of Beach	☐ 107	Other (Specify: _____)	☐ 112
Water Quality	☐ 108		

VIII. Indicate which of the following, if any, detracted significantly from your enjoyment of your visit to **this** Park/Campground?
(Place an "x" in the appropriate box(es)).

Excessive Traffic Speed	☐ 121	Vandalism/Theft	☐ 126
Dogs	☐ 122	Park Maintenance/Cleanliness	☐ 127
Loud Music	☐ 123	Overcrowding	☐ 128
Dusty Roads	☐ 124	Other (Specify: _____)	☐ 129
Late Night Parties	☐ 125		

IX. A) Has rowdiness been a significant problem for you **this** year at **this** Park/Campground?

1. Very Significant 2. Somewhat Significant 3. Not Significant 4. No Opinion

☐ 141

B) If your answer to Part A) was "**Very Significant**" or "**Somewhat Significant**" indicate which one of the following responses to the problem, you would prefer.

☐ 142

1. Stricter enforcement
2. More frequent patrols.
3. Liquor ban at **problem** parks on problem weekends.
4. Liquor ban at **all** parks on problem weekends.
5. Two year ban on park re-entry for persons convicted of rowdiness violations.
6. Other (Specify: _____)

X. A) How would you rate the overall helpfulness and courtesy of Park staff at **this** Park/Campground?

1. Very Good 2. Satisfactory 3. Needs Improvement 4. No Opinion

☐ 161

B) How would you rate the services provided by the following categories of Park staff which are available at **this** Park/Campground? (Place an "x" in the appropriate boxes).

	Very Good	Satisfactory	Needs Improvement	No Opinion or Not Available Here	Please indicate below the reasons for any "Needs improvement" rating
Park Gate Staff	☐	☐	☐	☐ 162	_____
Campground Office Staff	☐	☐	☐	☐ 163	_____
Park Patrol	☐	☐	☐	☐ 164	_____
Beach Patrol	☐	☐	☐	☐ 165	_____
Visitor Services					
Attendants/Naturalists	☐	☐	☐	☐ 166	_____
Maintenance Staff	☐	☐	☐	☐ 167	_____
Natural Resource Officer/ Park Ranger	☐	☐	☐	☐ 168	_____

XI. A) If you are **not** a camper please go to Question XII. Some campgrounds operate a volunteer campground host program. If you are a camper, did you meet a volunteer host in this campground?

1. Yes 2. No

☐ 181

B) If you answered "Yes", did you find the volunteer host to be helpful?

1. Yes 2. No

3. No Opinion

☐ 182

XII. A) What type of printed information is it important for you to have available at **this** Park? (Place an "x" in the appropriate boxes).

Map of area	☐ 183	What to see/do in the area surrounding this Park	☐ 186	Historical Information	☐ 188
What to see/do at this Park	☐ 184	Nature Information	☐ 187	Brochure for children	☐ 189
Park rules/regulations	☐ 185	Other (Specify: _____)			☐ 190

B) Would you be willing to pay a fee for this printed information?

1. Yes 2. No

3. No Opinion

☐ 201

XIII. Recognizing that there is limited funding available for constructing new facilities, what additional facilities would you like to see located at **this** Park/Campground?

(Place an "x" in a maximum of 5 of the appropriate boxes.)

Shower Facilities	☐ 211	Restaurant	☐ 213	Washrooms	☐ 226
Bicycle Trails	☐ 212	Cabin Rentals	☐ 220	Riding Stable/Trails	☐ 227
More Electrical Campsites	☐ 213	Lodge/Motel/Hotel	☐ 221	Canoe Routes	☐ 228
Store	☐ 214	Boat Rentals	☐ 222	Marina	☐ 229
Nature/Hiking Trails	☐ 215	Tennis Courts	☐ 223	Service Station	☐ 230
Picnic Shelters	☐ 216	Roadside Park Information Centre	☐ 224	Other (Specify: _____)	☐ 231
Children's Playground	☐ 217	Concession Stand	☐ 225	None of These	☐ 232
Laundromat	☐ 218				

XIV. Which of the following options would you prefer in order to reduce the net cost of operating Provincial Parks? (In order of priority please write the number of your first two choices in the boxes provided).

1. Closing smaller, less frequently used waysides, campgrounds and parks.
2. Later opening of campground (eg. June 15).
3. Earlier closing of campground (eg. September 6).
4. Reducing the frequency of grass cutting
5. Increasing park entrance fees.
6. Other (Specify: _____)

☐ 251
First Choice

☐ 252
Second Choice

- XV. A) Please estimate how many days, in total, you spent at Manitoba's **provincial** parks last year.
(Note: Riding Mountain National Park and Lower Fort Garry National Historic Park are **NOT** provincial parks, therefore disregard them when answering this question.)

1. None	3. 6 - 10	5. 16 - 25	7. Over 35	☐ 390
2. 1 - 5	4. 11 - 15	6. 26 - 35		

- B) Of the days referred to in Part A) of this question, how many were spent during the winter months of January, February, March and December?

1. None	3. 6 - 10	5. 16 - 25	7. Over 35	☐ 391
2. 1 - 5	4. 11 - 15	6. 26 - 35		

- C) How does the total number of days you spent in provincial parks last year compare to the time you spent 5 years ago?

1. Spent more time last year.
2. Spent less time last year.
3. About the same

☐ 392

- XVI. A) How would you rate your overall experience at **this** Park/Campground **this** visit?

1. Very Enjoyable 2. Somewhat Enjoyable 3. Not Enjoyable

☐ 393

- B) If your answer to Part A) was "**not enjoyable**", what is your reason for this rating?

- XVII. A) Where do you live?

1. Winnipeg	5. Province Other than Manitoba, Saskatchewan or Ontario	☐ 394
2. Manitoba Location Other than Winnipeg	6. Minnesota	
3. Saskatchewan	7. North Dakota	
4. Ontario	8. Other Location Outside of Canada	

- B) How far is it from your home to **this** Park/Campground?

1. Less than 40 kilometres (less than 25 miles)	4. 161 - 320 kilometres (101 - 200 miles)	☐ 395
2. 40 - 80 kilometres (25 - 50 miles)	5. Over 320 kilometres (200 miles)	
3. 81 - 160 kilometres (51 - 100 Miles)		

- XVIII. A) What is your age category?

1. Under 15	3. 20 - 24	5. 35 - 44	7. 55 - 64	☐ 396
2. 15 - 19	4. 25 - 34	6. 45 - 54	8. Over 64	

- XIX. How many people are there in your party?

(Please write the number of adults and number of children in the boxes provided).

A) Adults (persons age 18 and Over):

397

B) Children:

399

- XX. Please provide any other comments, concerns or suggestions you have about **this** Park/Campground:
